Scientific Officers
Leading Singapore Health And Science Agency

Our client is a large public organisation in Singapore responsible for the regulation of health products, blood services and forensic medicine and science. They are offering exceptional career opportunities for Scientific Officers within the following divisions.

• DNA Profiling Laboratory
• Forensic Science Laboratory
• Illicit Drugs Laboratory

In each of these Labs you will help supervise and train a team of highly competent Laboratory Officers. You will be highly motivated with a strong desire to protect public health and safety, passionate about your area of expertise and have excellent written and spoken English skills.

Minimum Requirements:

DNA Profiling Laboratory:
• Minimum BSc (Hons) 2nd Upper, preferable MSc in the Life Sciences, from a recognised institution. Undertaken undergraduate modules in Molecular Biology, Mendelian Genetics, Biochemistry and Statistics.

Forensic Chemistry and Physics Laboratory:
• Bachelor of Science (Hons), 2nd Class Upper Division in Chemistry/Material Science or above.
• Experience with GC/MS, HPLC, FT-IR, Raman and/or SEM/EDX is desirable.

Illicit Drugs Laboratory:
• Minimum BSc (Hons) 2nd Upper in Chemistry.
• A few years of working experience in an analytical laboratory is desirable.
• Experience with GC/MS and HPLC is desirable.

If you believe you have the experience for these roles, please forward your resume to claireb@ccentricgroup.com
