Positions available for Research Assistants (Casual)

• Shifts: Weekend daytime
• Location: Glebe
• Requirements: Reliable, flexible and professional
• No experience necessary – training will be provided
• Immediate start

The Woolcock Institute of Medical Research is one of Australia’s leading respiratory and sleep research organisations. We are seeking Research Assistants to help with our **Sleep and Circadian research studies** conducted at our state-of-the-art research facility in Glebe.

You will be required to work directly with research participants to collect data for our sleep research studies. Although you will be responsible for conducting a variety of laboratory and neurocognitive tests at regular intervals, during your shift there will be a considerable amount of ‘down-time’ between testing periods – providing an opportunity for you to study, if you wish.

Although no experience is required, Science / Health / Medical students are encouraged to apply.

For further information, or to apply, please enclose your resume and a covering letter and **email** to Chris Burke, HR Officer [chrisb@woolcock.org.au](mailto:chrisb@woolcock.org.au)
